Gnani AI Voice Intelligence Layer — ChainIQ ERP

Nov 9, 2026 · @Shadow

What It Does

ChainIQ ERP's voice layer lets a supply-chain operator speak a question and hear a spoken answer, powered end-to-end by Gnani AI's speech models. It supports two request types: direct ERP Q&A and SHAP-explained supplier risk briefings.

Architecture Flow

ChainIQ voice pipeline: listen, think, speak

Every voice interaction passes through the same three stages, regardless of which flow it serves.
